Index to Volume 72, 2007

	Issue	Page
A Bayesian model for gas saturation estimation using marine seismic AVA and CSEM data, Jinsong Chen, G. Michael Hoversten, Donald Vasco, Yoram Rubin, and Zhangshuan Hou	2	WA85
A borehole-model-derived algorithm for estimating QP logs from full-waveform sonic logs, Jorge O. Parra, Pei-cheng Xu, and Chris L. Hackert	4	E107
A case of SI attenuation in 4D seismic data recorded with a permanently installed array, Jan H. Kommedal, Per Helge Semb, and Ted Manning	3	Q11
A comparison of Heelan and exact solutions for seismic radiation from a short cylindrical charge, Dane Peter Blair	2	E33
A comparison of streamer and OBC seismic data at Beryl Alpha field, U. K. North Sea, Jonathan Stewart, Andrew Shatilo, Charlie Jing, Tommie Rape, Richard Duren, Kyle Lewallen, and Gary Szurek	3	B69
A field comparison of Fresnel zone and ray-based GPR attenuation-difference tomography for time-lapse imaging of electrically anomalous tracer or contaminant plumes, Timothy C. Johnson, Partha S. Routh, Warren Barrash, and Michael D. Knoll	2	G21
A Helmholtz iterative solver for 3D seismic-imaging problems, R.-E. Plessix	5	SM185
A homotopy method for well-log constraint waveform inversion, Bo Han, Hongsun Fu, and Hong Liu	1	R1
A laboratory study to determine the effect of iron oxides on proton NMR measurements, Kristina Keating and Rosemary Knight	1	E27
A model study for estimating optimum upward-continuation height for gravity separation with application to a Bouguer gravity anomaly over a mineral deposit, Jilin province, northeast China, Hualin Zeng, Deshu Xu, and Handong Tan	4	I45
A Monte Carlo approach to the joint estimation of reservoir and elastic parameters from seismic amplitudes, Miguel Bosch, Luis Cara, Juan Rodrigues, Alonso Navarro, and Manuel Díaz	6	O29
A nonsplit complex frequency-shifted PML based on recursive integration for FDTD modeling of elastic waves, Francis H. Drossaert and Antonios Giannopoulos	2	T9
A numerical study on reflection coefficients of fractured media, Oliver S. Krüger, Erik H. Saenger, Steven J. Oates, and Serge A. Shapiro	4	D61
A sensitivity analysis of DC resistivity prospecting on finite, homogeneous blocks and columns, Qi You Zhou	6	F237
A separable-kernel decomposition method for approximating the DSR continuation operator, Jing-Bo Chen, Hong Liu, and Zhi-Fu Zhang	1	S25
A simple design procedure for depth extrapolation operators that compensate for absorption and dispersion, Rune Mittet	2	S105
A tutorial on complex seismic trace analysis, Arthur E. Barnes	6	W33
A 2D numerical study of the effect of particle shape and orientation on resistivity in shallow formations, Etienne Rey and Denis Jongmans	1	F9
Aakervik, Odd Marius, see Mittet, Rune	4	F145
Abubakar, Aria, see Hu, Wenyi	5	SM169
Adaptive wavelets for analyzing dispersive seismic waves, A. Kritski, A. P. Vincent, D. A. Yuen, and T. Carlsen	1	V1
Agnihotri, Yogesh, Parsimonious migration of 3-C 3D VSP data,	6	S205
Aiken, C. L. V., see Ferguson, J. F.	2	I33

Amestoy, Patrick, see Operto, Stéphane	5	SM195
Ammerman, Mike, see Bayuk, Irina O.	5	D107
Amplitude analysis with an optimal model-based linear AVO approximation: Part I — Theory, E. Causse, M. Riede, A. J. van Wijngaarden, A. Buland, J. F. Dutzer, and R. Fillon	3	C59
Amplitude analysis with an optimal model-based linear AVO approximation: Part II — Field data example, E. Causse, M. Riede, A. J. van Wijngaarden, A. Buland, J. F. Dutzer, and R. Fillon	3	C71
Amplitude and phase correction of helicopter EM data, Yusen Ley-Cooper and James Macnae	3	F119
Amplitude-variation-with-offset, elastic-impedance, and wave-equation synthetics — A modeling study, Subhashis Mallick	1	C1
Amundsen, Lasse, see Nordskag, Janniche Iren	6	F249
An approach for 3D multisource, multifrequency CSEM modeling, R.-E. Plessix, M. Darnet, and W. A. Mulder	5	SM177
An effective medium algorithm for calculating water saturations at any salinity or frequency, Charles Berg	2	E59
An improved mesh generation scheme for the wave-front construction method, Kyoung Jin Lee and Richard L. Gibson Jr.	1	T1
An integrated geophysical approach for imaging of subbasalt sedimentary basins: A case study, Jam River Basin, India, V. Chakravarthi, G. B. K. Shankar, D. Muralidharan, T. Harinarayana, and N. Sundararajan	6	B141
An introduction to marine controlled-source electromagnetic methods for hydrocarbon exploration, Steven Constable and Leonard J. Srnka	2	WA3
An unsplit convolutional perfectly matched layer improved at grazing incidence for the seismic wave equation, Dimitri Komatitsch and Roland Martin	5	SM155
Analysis and application of coal-seam seismic waves for detecting abandoned mines, Daniel J. Yancey, Matthias G. Imhof, John E. Feddock, and Tod Gresham	5	M7
Angle-domain common-image gathers from anisotropic migration, Biondo Biondi	2	S81
Angus, D. A., True amplitude corrections for a narrow-angle one-way elastic wave equation	2	T19
Anisotropic velocity updating for converted-wave prestack time migration, Xiaogui Miao and Torre Zuk	2	D29
Annan, Peter A., see Pettinelli, Elena	2	A25
Anno, Phil, see Yu, Zhou	2	V41
Aochi, Hideo, see Cruz-Atienza, Víctor M.	5	SM123
Apparent-density mapping using entropic regularization, João B. C. Silva, Francisco S. Oliveira, Valéria C. F. Barbosa, and Haroldo F. Campos Velho	4	I51
Application of a linear finite-frequency theory to time-lapse crosswell tomography in ultrasonic and numerical experiments, Jesper Spetzler, Danijela Šijačić, and Karl-Heinz Wolf	6	O19
Application of a new 2D time-domain full-waveform inversion scheme to crosshole radar data, Jacques R. Ernst, Alan G. Green, Hansruedi Maurer, and Klaus Holliger	5	J53
Application of image segmentation to tracking 3D salt boundaries, Jesse Lomask, Robert G. Clapp, and Biondo Biondi	4	P47
Application of simulated annealing inversion on high-frequency fundamental-mode Rayleigh wave dispersion curves, Donghong Pei, John N. Louie, and Satish K. Pullammanappallil	5	R77
Application of the empirical mode decomposition and Hilbert-Huang transform to seismic reflection data, Bradley Matthew Battista, Camelia Knapp, Tom McGee, and Vaughn Goebel	2	H29
Application of the nearly perfectly matched layer in acoustic wave modeling, Wenyi Hu, Aria Abubakar, and Tarek M. Habashy	5	SM169
Application of time-domain airborne electromagnetic induction to hydrogeologic investigations on the Pajarito Plateau, New Mexico, USA, W. Scott Baldridge, Gregory L. Cole, Bruce A. Robinson, and George R. Jiracek	2	B31
Applying compactness constraints to differential traveltime tomography, Jonathan B. Ajo-Franklin, Burke J. Minsley, and Thomas M. Daley	4	R67
Approximate ray tracing for qP-waves in inhomogeneous layered media with weak structural anisotropy, Kaveh Dehghan, Véronique Farra, and Laurence Nicolétis	5	SM47
Aquatic electrical resistivity imaging of shallow-water wetlands, Nasser Mansoor and Lee Slater	5	F211
